TO WHOMSOEVER IT MAY CONCERN

This is to certify that RVS GROUP coconut farms situated in different parts of Tamil Nadu totalling around 45000 yielding trees are being fertilised by COCONUT BIO MIX produced by M/s. Rom Vijay Bio-tech (P) Ltd, Pondicherry since February 2015.

Since the COCONUT BIO MIX contains both beneficial microbes and micronutrients required for yielding trees perfect growth the health and the fertility of the soil has improved and yield has improved substantially.

The quality of the nuts also has improved much resulting in good returns for the farms.

As per advise recycling of all bio-waste from the coconut farms are being composted and used in the farm itself as an enriched organic manure.

We hope that this practice will definitely help in improving the farm fertility in the long run and will be a boon to RVS GROUP FARMS.

CHAIRMAN
